Whh SI Bkmrkng TI Ar Rght Fr Yu?

SEO (rh ngn tmztn) th bg tlk f Internet marketers, th rt f gtng rgn, fr, trff, whh converts t sales nd u hv no mrktng vrhd costs. I w n n SEO wbnr last wk on whh the presenter talked about I bookmarking tools as part f n SEO strategy. That t is mrtnt t nt nl bookmark your hmg, g nd t but vn rtl sites that have published ur rtl r ntnt sites tht you have td t.

Whn I d trt to gt the nfrmtn emails tht my rtl has been accepted I huld also bkmrk ll those article URLs. S you n ltrll gt hundreds f article t tng your content nd the best rt t bkmrk vr rtl URL. Tht a lt of wrk if u have vr tried to d all the I bookmarking mnull.

Of ur thr r m free I bkmrkng services n the Intrnt that llw u to t your URL to social bookmark sites. The best rv ut there wll t to but 79 t fr u, almost automatically and for FREE. Of ur u do need to t u h individual unt, whh n tk hours. If you wnt t rt more thn one unt r wbt t will nvlv a large amount f tm.

If u are gd with ur SEO then u are l rtng g n Wk nd thr content t. Those f course need t be bkmrkd wll. Pretty n t becomes ut vdnt that f u can utmt n part f this r it will save u hur of tm tht u uld b wrtng ntnt or mthng u nj more thn th rtu wrk f account creation nd URL submissions. T tll u the truth, th is not the mt njbl rt of SEO fr me.

The gd nw tht thr are programs tht wll utmt ur bkmrkng fr u. I have recently bn lkng fr th right program to urh. Currently I use th free online vrn but with ll f th lnk t bkmrk I wll ntll a rgrm, t t up and lt m PC t nd work whl I create on th M.

Chng th rght ftwr rl mrtnt and I wll list th features that u nd t lk fr n a bkmrkng rgrm.

Ct - Some of th posts I rd in frum wr people mlnng about the t f th bttr rgrm but th are obviously not social bkmrkng th w th huld be. If they wr th wuld rlz the thund f dllr vd n tm b automating th bookmarking r.

Gnrt Automatic User Accounts - Yu m knw th but whn I rtd ll th unt on Png dt fm it tk m hur nd u m knw hw much tm is nvlvd. Thr are programs tht wll automatically rt th unt fr you. Yu m nd t check ml to confirm the account rtn but u dn't hv t nvgt frm site to t.

Rndm Usernames on Aunt - In conjunction wth th ftur above that saves time there r rgrm tht wll also

generate random URLs to be more real.

SI Bkmark Shdulr - You want the return of bookmarks to look natural and human including the timing of the bookmark return. Most probably that through a program that allows you to handle your bookmarking. That way it appears natural.

Number of times SI Bookmarking Web - This program you want will allow you to manage a number of times at which bookmarking takes place. That way you can have more than one link for bookmarking to the same article.

Add bookmarking time - Most programs will load only the most bookmarking times. SI bookmarking time number will vary a hundred times or more regularly. A good program will allow you to add additional social bookmarking sites. You want to have your link on as many sites as you can, remembering the links, whether they are followed or not, they will bring traffic to your site.

SI Bkmark Automtll - Of course you are busy with other things so that more of your tasks are automated. You want to have the program post your web bookmark automatically.

Spin the Title, Description and Tags - You want to make sure the program will not just post these three elements to your bookmark but it will also spin the information to make it more natural.

Automatic Email Verification - When you submit your social bookmark from the site it will send you a confirmation email and the program that will check the email and activate the link automatically. The number of hours that you will save will be significant when you do this automatically.

Domain Crawler - If you have been blogging for a long time you may be thinking that to bookmark all those pages and posts is a monumental task? There are programs that will send a bot to crawl your website and list the pages. You can then list these on the program and add the Title, Description and Tags, handle the bookmarking and generate a feed.

RSS Crawler - Some programs will even crawl RSS Feeds so you can load those on the program and bookmark the RSS feeds.

Automated Posting - Some programs offer a posting service. Enter your websites and use the program to post them. Be cautious with your program as there are Web crawlers for posting and other services. If they are running you will be spamming.

Project Creation and Management - Do you have a program that would not allow you to backup all your work? Make sure your program saves projects so you can go back to it and even export it so you can keep it safe.

Randomized Settings - To ensure that all your bookmarking is not identical (example: having the same number of outgoing links and tags), you can randomize it by specifying how many percent of your tags are used for bookmarking.

Human Smultrn and Ant-Bt - This is a program that I found in most that mimics human multi-clicking with a human clicking and moving down to the next human click. You have heard it over and over that the bot makes things look natural. The game is not to "get it done" but to "do it right".

MultiThreading - This is related to multi software meaning they are able to perform a multitude of tasks at the same time.

Prx Srvr - If u wnt to use proxy rvr mk sure th ftwr u bu programmed fr th.

Cth - Thr ftwr that wll ntgrt third-party services that wll dthr th pages and does it automatically.

To nlud, you huld tht choosing the right l bkmrkng tl with rgrd to price ln would be a grt mistake. I hv rvwd a number f th l bookmarking tools n m uul Excel spreadsheet way nd I made m dn and m so h l dd and hv already vd hours and hur of tm. I w so xtd I wanted t share th gd nw with other l tht are n th r f mkng a dn.

Whng u u in ur l bkmrkng. Rmmb, "Dn't v a dm nd l a dllr."
